China Arrests **Reporter for** N.Y. Times

New York Times Service

NEW YORK --- John F. Burns, Beijing bureau chief for The New York Times, was taken into custody by Chinese security officials Thursday as he, his wife and two children were about to leave China for a vacation in Hong Kong.

"People are coming back and taking eharge of their lives," said Emily McPhie, Officials from the Beijing Public an Agency for International Development Security Bureau told diplomats at official. "Many of them will harvest a crop the U.S. Embassy in Beijing that in four months or so. It is very reasonable Mr. Burns would be charged with that with a little capital they can become spying, gathering intelligence information and entering an area forhidden in foreigners.

They said his detension involved his recent trip through the Chinese countryside to observe the effect of government reforms.

In New York, A.M. Rosenthal, the executive editor of The New York Times, said:

"Mr. Burns's trip was purely journalistic. There is no conceivable way that anyone could construe it as 'intelligence gathering' or 'espionage.'

Mr. Rosenthal said that he and the Times's foreign editor, Warren Hoge, would go to China immediately.

The last time China arrested a Western journalist was on Feb. 8, 1984, when Tiziano Terzani, an Italian who was Beijing correspondent for the West German publication Der Spiegel, was accused of smuggling antiques and defacing a portrait of Mao. He was expelled the following month.

[In Washington, a State Department official told the International Herald Tribune: "We are taking this case very seriously. U.S. Embassy officials in Beijing bave talked to Mr. Burns, to British Embassy officials in Beijing and to Chinese officials. The State Department has already registered its concern with officials with the Chinese Embassy in Washington."]

Mr. Khaddam, the highest-level Syrian leader to make an official visit to France in more than 10 years, said at a news conference that Damascus was continuing diplomatic efforts to free Western hostages kidnapped by fundamentalist groups. Two of nine French hostages were released last month. The fate of the remaining hos-

tages, who include three journalists and two diplomats, has become an important political issue here. Unlike the United States, which has ruled out bargaining with the kid-nappers, the French government has made significant diplomatic concessions to win the release of its citizens.

France has moved to improve relations with both Damascus and Tehran over the past few months in the hope that the two governments would use their influence with the kidnappers. Paris has also cracked down oo

the activities of Iranian exiles opposed to the regime of Ayatollah Ruhollah Khomeini and has indicated its readiness to repay a \$1.5billion Iranian loan frozen after the Islamic revolution.

At Thursday's press conference, Mr. Khaddam said that Syria was anxious to secure the release of all end of the year to maugurate a French cultural center.

In an interview with the Paris daily Le Figaro, the French foreign minister, Jean-Paul Raimond, said he expected the remaining seven French hostages to be freed together. He said he was "almost sure" that the release of two members of a television team June 20 was a preliminary step before the release of the remaining hostages. Mr. Khaddam said he had "no

oew information" when asked about attempts by King Hussein of Jordan to improve relations between Syria and Iraq, bitter enemies for more than a decade. The issue is a delicate one, be-

cause a reconciliation between Damascus and Baghdad would incyitably be resented in Iran, which has counted on Syrian support in its war against Iraq. A planned meeting last month

between the Syrian and Iraqi foreign ministers was canceled without explanation. French officials have privately expressed concern that strains between Syria and Iran could complicate efforts to secure the release of the hostages.

said by telephone. Mr. Espinosa, whose splintered party holds five National Assembly seats, was the first opposition deputy to seek asylum since the legisla-

ture began work in January 1985. The legislature, which is dominated by the governing Sandinist Front, voted Toesday to strip Mr. Espinosa of his immunity. It accosed him of having ordered the burning of his own house in an effort to embarrass the government. He denied the assertion.

Since the U.S. House of Representatives approved \$100 million in aid to anti-Sandinist rebels on June 25, Sandinist leaders have gone on

oved by the Senate soon. On Wednesday, senators opposed to sending military aid to the Nicaraguan rebels said that they would stage a fibbuster against the legislation when it reached the floor, The New York Times reported.

When the Senate considered aid for the rebels earlier this year, 53 senators voted in favor of support. Sixty votes are needed to break a filibuster, so the opponents said they had a "reasonable shot" at stopping or altering the aid request, according to Senator Alan Cran-ston, a Democrat of California.]

In the face of the pending aid, guan organizations must close

ranks around their revolutionary

program, warning that groups that By Julia Preston do not will be regarded with suspi-cion as being in league with the

A range of Nicaraguan opposi tion leaders said that the U.S. Congress had given the Sandinists an excuse to limit the opposition's Feitz Pedro Espinosa, a deputy excuse to limit the opposition's from the Non-Official Democratic room for maneuver, even more than before.

"We are in a spiral of polarizafurther restrictions on our political ace," said Erick Ramirez, head of the Social Christian Party, the largest in the opposition.

The leaders said that the main strength of their position now is simply to remain in Nicaragua, and even that is becoming difficult.

Last week, six opposition partie called a news conference to say that aid to the rebels would "presage more violence and suffering for the Nicaraguan people. They called on the government

to form a peace commission to negotiate a cease-fire.

Asked what chance the party leaders saw that the government would heed their proposal, Mario Rappaccioli, head of one Conservative Party faction, responded, "It would be a miracle."

Of 13 political parties in Nicara-gua, six oppose the leftist government from conservative viewpoints. Four are allied with labor and business groups in the Nicaraguan Democratic Coordinating Group, which does not participate in the government or the legislature. Four Marxist-inspired parties criticize the government from the

left. The Sandinist Front confirmed its dominance as a majority party in national elections in November 1984. Although intensely controversial, the elections were described by most observers as free of fraud. In other developments:

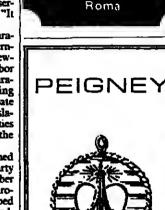

• The Nicaraguan government rejected on Tuesday an appeal from Roman Catholic bishops that Bishop Pablo António Vega Mantilla be allowed to return from abroad.

A letter in the Sandinist newspaper, Barricada, signed by the minis-ter of the presidency, René Núñez. Téllez, said the bishop had "left us no option" because of his "personal attitudes and illegal acts." He was barred July 4 while in Hondu-(UPI)

Despite more inspectors, immigration officials said delays were key to continue into the busy summer travel season. Representative Charles E Schwaren et al.

Representative Charles E. Schumer, the New York Democrat who Report each the agreement, said the additional inspectors "should diminate the three- to four-hour waits and cut the average processing inse from 75 minutes to 50 to 60 minutes."

Inne from 75 minutes to 50 to 60 minutes." Innigration officials at Kennedy airport said budget cuts and difficients at Kennedy airport said the immigration agency was also seeking to replace by August its cumbersome "lookout" listings of security suspects with a computer system already in place at Newark International Airport. Mr. Schumer said he planned to introduce legislation that would dow the immigration service to levy a \$2.50 charge on some arriving breigners to raise \$73 million a year to defray processing costs.

much of the heroin reaching the much of the heroin reaching the Is to Retire share varies from season to season. Most of the heroin from the region does not go to the United States, and American officials say the big-

gest single source of heroin today is Mexico. Turkey, no longer a producer, has become the principal country from which hashish, heroin and unprocessed opium or morphine or heroin base are dispersed to dealers and finally to Western users.

Most of the opium or intermediary products reach Turkey, often on horseback or mulchack, across its 300-mile (480-kilometer) mountainous border with Iran. It is processed in heroin laboratories in Turkey or other countries.

The more important conversion centers have long been in Lebanon and Italy, particularly Sicily. In reand rank, paintenanty shary. In re-cent years, narcotics agents say, new laboratorics have sprung up in Aleppo in Syria. Middle Eastern refiners receive their supplies of morphine base or heroin base largely by overland smuggling from

Turkey. A new element of concern to agents is evidence that in the last two years the Bekaa region of Leb-anon, which is largely under Syrian control, has been producing highquality opium.

Ex-NASA

Lawrence B. Mulloy

By Kathy Sawyer Washington Past Service WASHINGTON - NASA has

announced the abrupt retirement of Lawrence B. Mulloy, the proud, unrepentant career manager who took the brunt of the criticism in

the Rogers Commission report on the Challenger accident. Mr. Mulkoy, 52, plans to retire Friday after more than 30 years of government service, the space agency said Wednesday. Officials said Mr. Mulloy has given no reason for his decision and be took sick leave Wednesday, declining to

talk to reporters. The veteran of the National Aeronantics and Space Adminis-tration was in charge of the faulty solid-fuel rocket boosters that destroyed Challenger on Jan. 28. He was among those who argued the night before the launch that cold weather was not a significant factor and pushed for a "go" over the objection of engineers. The report of the presidential

commission headed by William P. Rogers repeatedly faulted Mr. Mulloy's judgment and his failure to correct the boosters' known design and performance problems. It suggested that commissioners believed that Mr. Mulloy lied in his

testimony to them. Mr. Mulloy

Mr. Mulloy's decision to retire came after James C. Fletcher, the NASA administrator, had decided to move him from Marshall Space Flight Center in Huntsville, Ala-bama, to Washington headquarters as deputy director of the propul-

fice of aeronautics and space tech-

Message to Pretoria

martial law, President Reagan proposes to send as his next ambassador a North Carolina businessman, Robert Brown, who happens to be black. And wby not? Why not remind Pretoria that the United States is a multiracial society directly affronted by its racist doctrines? Mr. Brown has no diplomatic experience, but his political acumen is admired ecumenically across the spec-trum, from Senator Jesse Helms in Mayor Andrew Young of Atlanta. The catch is that any ambassador can

only be as effective as instructions permit. Would Mr. Brown engage with South Afri-cans of every bue, including the blacks so long shunned by Washington? That would signify a genuine shift after five years of wrongheaded appeasement of South Africa's white power structure. Unless Mr. Brown packs a new policy, his designation would be only an offensive, racial stunt intended to fend off demands in Congress for economic sanctions What is afont should be plainer next

week, when Secretary of State George Shultz divulges the results of a much-touted policy review. Mr. Shultz already has urged the Senate not to join the House in supporting sweeping sanctions. He should succeed only if be acknowledges the failure of the "constructive engagement" with Pretoria to promote significant political reforms and the damage it has done in alienating South Africa's black majority,

Grievously missing in Washington's de-nunciations of apartheid is any sense of

With South Africa seething under virtual urgency about the victims in an onrushing tragedy. Mr. Shultz said last month that apartheid "must go" and be replaced by a democracy that knows no color." But this now needs elaboration while there is still time to achieve the goal without violence.

The antagonists in South Africa are not waiting for a broker to bring them to agreement. They are careering toward a civil war in which the United States, even if it were not perceived as the white regime's ally, would be trumped by Communist weapons flowing to blacks.

If that is in be averted, Americans must press all sides toward accord by reaching out to black leaders. That necessarily includes the proscribed African National Congress, whose leaders insist they have turned to violence out of desperation. Though the administration has called for the release of Nelson Mandela, the group's imprisoned leader, it has skittishly avoided open contact with its spokesmen in exile. The Congress includes Communists and

has ties with the Soviet Union. Why not contest that influence? That requires no legislation, and involves no sanctions. Why not constructively engage the entire spec-trum of black organizations that aspire to nonviolent change? A willingness to attempt it is the first requirement of a policy that makes America a vital player in this

high-stakes confrontation. If that is the next ambassador's mission, it would not much matter, as it should not matter, what his race.

- THE NEW YORK TIMES

A Boom in Trouble

At the start of the year there was a broad that is contributing to poor U.S. economic consensus among forecasters that the U.S. performance bere. Last winter most Amerieconomy would grow strongly in 1986. The Reagan administration thought so, as it always does, but other people with no political interests agreed. Yet the growth rate last winter was modest, and in the spring. by all indications, it was even lower. The optimists still expect an acceleration over the summer and fall, but the evidence for it seems increasingly fragile, Where did January's promising forecasts go off the track?

The most serious of the disappointments has been in foreign trade. The foreign sector has become a substantial and persistent source of error in American economic forecasting, not only within the administration but among independent scholars as well. One reason is that the United States bas never before run trade deficits on the present gigantic scale. Experience is the basis for economic analysis, and in this case there is very little experience to go on. Beyond that, the U.S. government's statistics on foreign trade are notoriously unreliable and are apparently getting worse as the Com-merce Department tries to save moncy on its obsolete reporting system.

More important, there has been a central failure of policy — not on the part of the Reagan administration, but by the Japanese and especially the West Germans -

can economists assumed that, as the U.S. dollar's exchange rate fell, Japan and West Germany would respond rationally and forcefully to speed up their own economies and keep trade expanding worldwide. In-stead they have done little. West Germany has slowed down, and Japan is evidently going into a recession. So there is less demand for American exports than expected. If this slowdown develops into a world recession next year, Tokyo and Bonn will

bear a beavy share of responsibility. In America the government published figures this week showing that retail sales have been rising steadily while industrial production is lower than a year ago. How can consumption rise while production falls? The explanation is the foreign trade deficit. Imports fill the gap. Because production is falling, there is plenty of spare capacity in American industry, and busi-nesses have been cutting back new investment. Business investment is one of the key determinants of economie growth, and fall-ing investment is not a healthy sign. As long as the trade deficit remains sky high and business investment continues to slide, it is hard to see what could produce faster eco-

nomic growth in America, or in the world. - THE WASHINGTON POST.

finds itself facing a balance-of-payments crisis. There are many reasons for the deterioration of

In Britain, Symptoms **Of an Identity Crisis**

By Philip Geyelin

LONDON - "WHO are WE?" That the queen has probably never exercised her royal prerogative to raise so elementary a question with ber prime minister, Margaret Thatch-er, in one of their regular weekly chats is of no moment.

The question is ever-present here. It colors every conversation with Britons of all sorts. It leaps out of opinion polls. It is encapsulated in the bitter British debate over South Africa, with Mrs. Thatcher presenting herself as the senior statesman of the Western world, making global wayes while ber opposition worries

Tough Tests Ahead for a Lately Unlucky Australia

SYDNEY — Australians who call their nation "the lucky country" are wondering if the luck has finally run out. The national treasurer, Paul Keating, inld his countrymen last month that unless they got their act together they would end up living in a banana republic.

His remarks sent the Australian dollar into a downward spiral that saw it shed more than 10 percent in a matter of weeks. In 18 months the dollar has fallen by 35 percent and Australia, a major borrower in miternational markets (total debt is 80 billion Australian dollars, or \$50 billion),

this rich little economy, the most important being the drop in commodity prices since late last year. Australia's almost bedonistic lifestyle is based on its ability to produce farm products and miner-als cheaply and efficiently. Despite rapidly increasing output in the last year due to earlier falls in the dollar, the trade deficit remains stuck at

The terms of trade have moved against Australia by a staggering 14 percent in a few months. The fear is that this is not just another trough in the commodity cycle but a sign of structural change. Australia's largest single export is wheat, cur-rently the object of a trade war between the United

exchange to pay off their borrowings. Japan and the United States form the major

market for Australian output, Japan has slipped into negative growth, while the United States is slowing down. The Japanese situation underlines the depth of difficulty Australia has found itself in.

much to the availability of Australian iron ore and ccal as it did to the favorable exchange rate gifted to Japan by General Douglas MacArthur. Unforendowments underwrote both a comfortable life-

By Maximilian Walsh style and an economic structure incapable of rapid

justment to the sort of change now occurring. Investment has for decades been channeled into developing new mines, oil and gas fields. The population of only 15 million was not large enough to sustain a broad-based manufacturing sector. What manufacturing there was failed to adapt or to seek export markets.

An official policy of high tariffs based on the politics of creating employment, and financed by the wealth of commodity exports, created industries basically dependent on governmental good will Behind the tariff wall, Australian workers were among the highest paid in the world — and also the most strike-prone. A lack of competition meant that manufacturing did not worry about maintaining up-to-date technology.

With the first oil shock of the 1970s, Australia suffered an economic shakeout which led to ques-tioning of the high tariff policies. They were too entrenched to be reversed, but the politicians of both sides agreed that past policies had enfectled

rather than nurtured manufacturing. Then came the second oil shock, in 1979-1980, The conservative Fraser government, seeking re-election, forecast a commodity boom based on international demand for Australia's seemingly limitless reserves of coal. The boom did not materialize, but the Fraser boosterism did prompt the metal manufacturing and heavy engineering industries to capitulate to workers' demands for large pay increases in the expectation of lucrative contracts from new mines.

The wage increase was transmitted through an conomy that is highly mionized, where a plumber in another regardless of relative profitability. Wage-fed inflation soon produced accelerating unem-ployment. That, combined with a long, nasty drought, saw the Fraser government defeated in the 1983 elections by a Labor Party led by Bob Hawke, former head of the trade union movement. In an episode that helps explain why Australia is called the lucky country, the drought broke within days of Mr. Hawke's election. He forged a pay accord with the industrial movement, aimed at keeping a cap on wage increases. Then he and his treasurer used an expansionary fiscal policy to

Most of the funds for this were borrowed abroad. The end of the drought, and a recovery led by the public sector, were complemented by a deregalation of banking and financial markets that saw the entry of 16 foreign banks into the country. The dollar was floated and exchange controls dis-maniled. Private investment inquished, but financial markets churned with takeover activity, most of it financed by the new banks seeking market share. Much of the funding was raised overseas. Since 1980, when total foreign debt was 13.9

billion Australian dollars, the money has poured in, reaching the 80-billion figure this year. Debt

Bob House, by LiiplE.

service payments have moved in that period from 8.3 percent of exports to over 34 percent.

The international markets, noting this trend, marked the dollar down sharply early last year. This slowly has affected trading activity, with import volume falling and exports rising. But the terms of trade have canceled that out.

The government has signaled that it is now prepared to take the tough fiscal steps necessary to reduce the demand for imports. It is due to an-nounce its budget in mid-August. While Australians are bracing for a period of austerity, the real nerve of the government has yet to be tested.

The writer is an Australian syndicated columndst and broadcaster. He contributed this comment to the International Herald Tribune.

over Britain being odd man out. The same question compounds, nore broadly, the deep divisions within the ruling Conservative Party and within the opposition — as well as the warfare between them. More so than at any time since World War II, the British are in the grip of an identity crisis. The roots run to the collapse of

Ľ. 3

empire and to Britain's protracted empire and to Britain's protracted game-playing in the formative years of the European Community, before finally joining up (the early ambiva-lence lingers); they run to the value placed by some, including Mrs. Thatcher, on a cherished "special re-lationship" with the United States and an independent Britisb nuclear enablity, and the recentment (elt by capability, and the resentment felt by others about British dependency on Washington's will and whim.

To these tags and hauls, add the Commonwealth connection and you have the makings of something on the nature of a national nervous breakdown, with various consequences for American foreign policy. The symptoms are everywhere. Item: The immediate worry over

what Mrs. Thatcher's opposition to wide-scale "punitive" sanctions against South Africa is doing to the Common wealth Games in Edin-burgh. A few proud Britons may resent the impertinence, but most would deplore lasting damage to the Commonwealth itself — and none more so, one surmises, than the queen who presides over it.

When the queen, as Victoria would have it, is not amused, the Briton on the street is not amused.

Item: The recent flaps over Westland and Leyland, the former a failing British belicopter manufacturer and the latter a troubled builder of antomobiles. Without laboring the details, the issue in both cases turned on the pros and cons of bailouts or takeovers by American firms. As one U.S. diplomat put it, "Westland anc-Leyland stirred up the whole question of dependency on America

Item: The use of bases in Britain for the U.S. air strike on Libya, com-ing hard on the heels of Westland-Leyland. "The stage was already set for a critical re-examination of the relationship with us," said another U.S. official. And the public judg-ment of Mrs. Thatcher's acquies-cence to the Libyan air strike was overwhelmingly critical. The taunt that she is Ronald Reagan's "pet poodle" has become a fixture in the opposition's cries in Parliament.

Item: The swarms of anti-nuclear protesters in the halls of Westminster. The nuclear disarmament movement is looder than it is large, but it is the cutting edge of a public disincli-nation to depend on the United States for British security.

The resulting contradi

China Schools Itself

Communist states in their attitudes toward foreigners is endlessly fascinating. The Russians invariably assume that the visitor is, if not actually a spy, at least a subversive influence from which the population must be shielded. The striking thing about the Chinese, in contrast, is their cool self-confidence. A current example is the joint graduate center that Johns Hopkins University is establishing with Nanjing University. Classes begin in September. The first

year's 22 American and 43 Chinese students are to live and work ingether, each of the Americans with a Chinese roommate. Both universities contribute faculty. The courses, get into a number of sensitive subjects recent history, the structure of the two economies, Mao's thought (taught by a Chinese scholar in Chinese) for the Americans. American political institutions (taught by an American in Englisb) for the Chinese. The library is in be half Chinese books. half American and European, on open shelves. The Chinese are engaged in a sweeping

The differences between the two great reorganization of higher education, to produce more people with the abilities that a modern economy requires. The presidents and vice presidents of 11 Chinese universines have been at Johns Honkins in Baltimore to meet some of their American counterparts. The Chinese are looking carefully at foreign models as they rebuild their system, and the exchanges back and forth are widening. It is particularly remarkable when you consider that the country was almost totally closed to visitors for nearly a generation after the revolution.

Another indicator of Chinese attitudes is the number of students permitted to study in America, confident that most will return. More than 10,000 Chinese currently attend American colleges and universities, compared with hardly more than 200 Russians. The flow in the opposite direction, in China, is limited more by lack of facilities than by political constraints. Johns Hopkins's joint venture is an adventurous and promising attempt to widea those opportunities. - THE WASHINGTON POST.

Other Comment

Commonwealth Friction

The rumor that India might organize alternative Commonwealth Games appears to herald a new phase in a war of nerves over a former Commonwealth member. South Africa. Margaret Thatcher bas thrown herself into a very complicated and risky midfield game. What does she hope to obtain with her sermons on international morality, in such shrill contrast to what most civilized nations have come to see as necessary in dealing with South Africa?

The latest wisdom is that she goes as far as she does in opposing sanctions so as to be able to majestically concede a few miniconcessions at the Commonwealth meeting [next month in London].

Prime Minister Rajiv Gandhi of India was right when he said recently: "[Why should] we withdraw from the Commonwealth? When 48 countries agree, and one disagrees, would it be logical that the 48

withdraw?" It is hard to imagine that Mrs. Thatcher would put at stake the relations of her country with millions of people around the world in order to save South Africa in a

way despised by the majority. One can only bope that Mrs. Thatcher's indifference toward the Commonwealth is faked. Britain should count its blessings in having special bonds of friendship with this varied group of countries.

- NRC Handelsblad (Rotterdam).

The Lucky Country

Has the "lucky country" run out of luck? Has Paul Keating, dubbed the world's best finance minister by Euromoney magazine last year and who is the obvious beir apparent to Prime Minister Bob Hawke's leadership of the Labor Party, lost his marbles? The growing consensus in Australia is yes to the first and a guarded no to the second. - Peter Costigan, Daily Telegraph (London).

The complaint provoked a sharp rebuke from the French Foreign Ministry for "unacceptable interference."

Amid all this, American officials predicted that Middle East terrorists. apparently lying low just now, are likely to switch tactics and launch group in Europe, to four years on large-scale random attacks in Europe relatively mmor charges. He has al-American fears of foreign travel. The tourist industry has been hard hit.

GENEVA - Earlier this month Japan and Norway announced

This certainly does not look like the great increase in cooperation. among governments to block terrorism that has been claimed. It looks like continuing national narrow-mindedness, each country trying to look out for its own and forget the

consequences for others. The anguish of negotiations for the return of bostages is understandable. The primary duty of each state to protect its citizens is undeniable. Legal systems and court procedures remain a national affair.

But it is clear that despite all the public posturing, there is still really no agreed Western stand on how to deal with terrorism, and whether or not to make concessions in an attempt to head it off. The media have been criticized for

elping the terrorists, who need publicity to spread their message of menace. It is true that they sucramb, not only in the obligation of reporting the news but in magnifying the sensation. Politicians too are tempted by the

rewards both of talking tough and of trying to deliver hostages. Spectacu-iar measures, such as the U.S. raid on

Libya, did not succeed in demonstrating that terrorism does not pay, just that it is not a good idea to boast about it as openly as Libya's Colonel Moammar Gadhafi liked to do.

After the raid, be told an interviewer that he was "very surprised, because I could not imagine how they could attack a head of state in his house with his family. It has not happened before in modern history." His history is bad — many heads of state have been attacked and even killed but he seems to think attacks should be reserved for those of lesser status. The effective proof that terrorism

does not pay is that it has achieved no modern cause beyond grabbing public attention and, occasionally, winning the release of prisoners so they can strike again. This fact needs to be proclaimed, loud and often.

It is a mistake to suggest that the motives of political terrorists should be examined sympathetically. They are sick minds who dishonor any cause. It is also a mistake to be con-cerned about which terrorists are which, except in terms of catching them. They are everybody's enemy, whomever they hit.

The New York Times

no sense: The opposition Labor Par-ty sounds as if it is wedded to unilateral nuclear disamnament and to denying base rights to the United States - as if this somehow could be compatible with membership in the North Atlantic Treaty Organization, with its strategy of deterrence calculated on the availability of British nuclear forces and U.S. base rights in Britain.

Item: A paradox of the "anti-Americanism" in opinion polls. A large majority "like" Americans, according to a recent study by Market and Opinion Research International. What they definitely do not like, by even larger majorities, the study found, is excessive American influ-ence over British industry, or the economy, or defense policy, or morality and television.

Even worse, considerable major-ities questioned Mr. Reagan's judgment and doubted be could be "trusted to look after British interests." One in five even rated America as a bigger threat to peace than the Soviet Union, and one-third saw nothing to choose between the two.

Ordinarily the electorate would clear the air; a general election will be held no later than 1988. But the fluctuating polls, now showing the Labor Party with a chance for a working parliamentary majority, more often show a roughly even three-way split between Labor, the Conservatives and the Alliance, the loose partnership between the old Liberal Party and disaffected Laborites.

A clear Labor majority could have a transforming effect on Britain's in-ternational relationships, special or otherwise — but that is not to say it would crystallize a new British sense of identity. If Britain cannot figure out what it is — or wants to be — after five years of rule by a steely prime minister with a mammoth parliamentary majority, you have to wonder how long it will be or what will have to happen before it can.

1911: N.Y. Cholera Scare 1936: Sing, but Later WASHINGTON - Both the Feder- PARIS - [A reader writes:] "Have al health authorities and the health officers of New York are showing some concern over the spread of cholera, the first cases of which were brought to this city by Italian immigrants. There have been three deaths within 48 hours and 15 patients are in the detention hospital, six of whom will probably die. There is indeed danger of a cholera epidemic unless strict precautions are observed, and Dr. Wyman, the Surgeon-General of the Public Health and Marine Hospital Service, issued orders [on July 17] that all immigrants arriving from any port where choiera has appeared are to be placed in quarantine for 10 days, then to be released only if they are in perfect health. The Governsay quartets of accordions for dinner ment officials believe that the Italian Government is suppressing news in music. "I don't know that it's ever hurt," said Mr. Ehrlichman. "I can't say that I've ever had a downside experience. Oh, I take that back I

had one. A doctor once refused to treat me." H.R. Haldeman, who now lives in Santa Barbara, California, and who is part-owner of a real estate investment firm and of several steak house restaurants, says his experience, after the initial jolt of Watergate and the sudden departure from Washington, has been similar - no one has refused to dn business with him because of his past. "It's really the other way around," he said.

Indeed, there seems to be a recycling under-Alter an interest and intelligence of public prominence for some. Two months

ago, former President Richard M. Nixon ap-peared on the cover of Newsweek, which de- But he added, "There's a silver lining in any

Duke University political science professor. Mr. Ehrlichman puts it a bit differently: Americans, he says, do not distinguish sharply between fame and notoriety. Either sells.

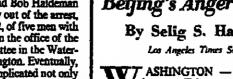

Are the Watergate figures capitalizing on their misconduct? They shrug off the thought, pointing out the punishment they endured for their misdeeds: Twenty-five people went to prison, many lawyers among the defendants were disharred, all suffered disgrace initially, along with enormous legal bills. Although the more famous turned quick profits by writing memoirs and giving lectures, some defendants initially had to depend on friends for help.

"Five years in prison I would oot characterize as a benefit," said Mr. Liddy, who says he earns several hundred thousand dollars a year

The prison terms, the disbarments, the rise of John Ehrlichman as writer and Bob Haideman as steak house owner all grew out of the arrest, at 2:30 A.M. on June 17, 1972, of five men with cameras and electronic gear in the office of the Democratic Notional Committee in the Watergate Hotel complex in Washington. Eventually, White House officials were implicated not only in covering up the break-in but also in using federal agencies in a campaign to discredit Democratic opponents.

Mr. Nixon eventually faced the near-certainty of impeachment in the House of Representa-tives and probable conviction in the Senate. On Aug. 9, 1974, he became the first president in history to resign.

What follows is a look at how the nation and the marketplace are treating some Watergate figures a dozen years later.

Arms Assistance to Taiwan Beijing's Anger Over Licenses Strains Relations

Irritant in U.S.-China Ties:

By Selig S. Harrison Las Angeles Times Service

حكدا مستر لمسطول

ASHINGTON - Growing tenvions over Taiwan pose the most seri-ous challenge to U.S.-Chioese rela-tioos sioce Washingtoo recognized the People's Republic of China seven years ago.

In an interview in Beijing, the Communist Party leader, Hu Yaobang, flanked by Depu-ty Foreign Minister Zhu Qizhen, criticized U.S. policies on Taiwan. The recent visit to Washington by Mr. Zhu marked the start of a Chinese attempt to bring about reduced U.S. military support for Taiwan as part of a broader shift in American policy.

Questioning U.S. good faith in honoring an agreement limiting arms sales to Taiwan, Mr. Hu asserted that the United States was "not friendly in China regarding Taiwan, and if you remain unfriendly over a long period of time, we would oot tolerate that."

The United States is caught between two commitments: one to the Congress and the other to China. Washington insisted on retaining the right to sell arms to Taiwan when it established ties with Beijing.

But Congress went a step further, enacting the Taiwan Relations Act, which requires U.S. sales of weaponry to Taiwan "suffi-cient" for its defense. This has provoked tensions with Beijing. They were papered over when U.S. and Clunese leaders signed the Second Shanghai Communique on Aug. 17, 1982, in which the United States pledged that arms sales to Taiwan "will not exceed. either in qualitative or quantitative terms," the post-1979 level.

The United States has reduced its arms sales by \$20 million each year since the communique. But tensions over Taiwan were rekindled last year when Beijing learned that the United States had begun to license technology exports to Taiwan for the manufacture of advanced weaponry.

China views the licensing as a violation of the 1982 commaniqué. Washingtoo responds that it did not cover technology transfers.

HINESE anger mounted in recent months as U.S. military publications reported hush-hush details of Taiwan's \$1-billion program to produce what is called an "indigenous defensive fighter air-craft" containing a late-model U.S. engine and avionics technology.

Washington refuses to sell Taipei the F-20 or the F-16, since these would represent a qualitative increase over the F-5E, currently the most advanced plane in Taiwan. But sources in Taipei, Washington and U.S. companies say that the plane will "approach" the F-20 in some of its technology and will look like a "small version of the F-16."

Mr. Hu said that even if not mentioned directly in the 1982 communique, "technol-ogy transfers are clearly covered."

"What is the difference," he went on, "between arms sales and the transfer of technology for the manufacture of armaments? Transfer of technology sounds better. But it is the same thing as arms sales."

"We are not clear about the exact level of technology being licensed by the United States for the airplane," Mr. Hu said. "But if it is a fact that the U.S. is using technology

transfers to circumvent the limits on quantitative and qualitative increases, it would constitute bad faith. China would take a stern position and would give serious consideration to the proper measures of response."

Page 5

S INCE China, too, receives U.S. mili-tary help for its air force, and says it wants to remnite China by peaceful means, why does it object so strongly to arms for Tainei?

Apart from its concern with the military balance as such, China views U.S. arms sales as a symbol of Washington's intentions concerning the future of Taiwan. Beijing envisages a gradual increase in China-Taiwan con-tacts and trade during the years ahead, leading eventually to negotiations under which Taiwan could contain a "high degree

nf autonomy" in accordance with Beijing's concept of "one country, two systems," The United States has declined to endorse

this concept so far, arguing that it waots to leave the destiny of Taiwan up to the Chinese on both sides of the Taiwan Strait. But Bejing contends that the United States is already deeply iovolved in the issue and will continue to be so long as it continues high levels of weapons sales to Taiwan, along with sales of advanced military-related technology, totaling \$150 million in 1987.

China recognizes that unification will take time, Mr. Hu indicated, but he wants to know whether we are going in the same direction."

"We don't find unanimity of views among the present leadership in the Uoited States concerning Taiwan," he added. "Do they want to see China unified, or do they want some form of iodependence for Taiwan? At least some people in Washington consider Taiwan an unsinkable aircraft carrier. Others seem to have a wait-and-see attitude. If the U.S. would make up its miod it would make possible o gradual process of peaceful unification."

lo Beijing's perspective, a more rapid re-duction of U.S. arms sales would signify a more central U.S. nttitude toward unification, while the present policy suggests a U.S. desire to perpetuate a de facto independent Taiwan for as loog as possible.

The issue of arms to Taiwan produced a tense and inconclusive exchange between Mr. Zhu and Michael H. Armacost, the U.S. undersecretary of state for political affairs. Many U.S. officials contend that China does not really care about the Taiwan issue as much as it proclaims, but uses it to keep the United States on the defensive to exact concessions on other issues. All that China really cares about is economic modernization, they insist. But this view underrates the unification objective in Chinese politics.

Selig S. Harrison, a senior associate of the Carnegie Endowment for International Peace, recently spent a month in China and Taiwan as part of a study of the Taiwan issue.

John D. Ehrlichman, left, H.R. Haldeman, below, and G. Gordon Liddy, now an actor. parlayed his Watergate experience into a lucra-tive best seller, "The Ends of Power."

He says he plans to write another book on his White House years.

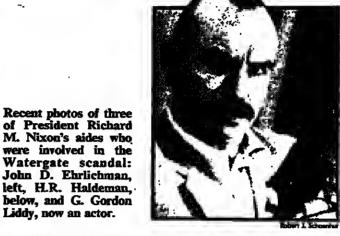

He believes his Washington years have little direct effect on his current activities but added: "I don't have trouble with people knowing my name. I guess that's an advantage."

John D. Ehrlichman

"I prefer this life, where you quit at 1:30 in the afternoon," said the former chief domestic affairs adviser to Mr. Nixon, of his new career as a writer. Mr. Ehrlichman, 61, has just pub-lished a new novel, "The China Card," about a spy on Mr. Nixon's staff. Simon & Schuster's marketing campaign for the book stresses the anthor's familiarity with Washington.

Sporting a beard and a dressing style that make him look a bit like a leftist academic, Mr. Ehrlichman lives on a quiet street in Santa Fe. He came to Santa Fe after his 18 months in prison, he says, because he was looking for a quiet place to write.

Mr. Enrlichman's first book was "The Com-pany," a novel about the CIA, which sold more than one million copies and became a television series. Next was "The Whole Truth," a White House novel, which did not do very well. Then came his memoir, "Witness to Power," which was a Book-of-the-Month Club selection. "The China Card" is a Book-of-the-Month

Club alternate with a big first printing 90,000 copies.

TOCKHOLM — The 24,000 is-lands of the Stockholm archipelago float in a gray-blue sea like so many pieces of broken china scat-tered across the floor, in every conceivable shape and size, from tiny shards to the odd half-plate with a jagged edge. This island world, covering an area the ze of Connecticut, actually starts in

its meadows in June and early July is magnificent.

The easiest way to get around the archielago is on the bus boats of Waxholm Co., which cover many of the inhabited islands. Many of the boats do justice to their name, being all too buslike, practical but rather dull. There are, however, two ontstanding exceptions: the steamboats Storskar (built in 1908) and Norrskar (1910). Gleaming with polished wood and brass, they chug proudly but at no great speed among the islands. The Storskar offers a pleasant lunchtime cruise around the islands nearest Stockholm. The Norrskar runs a day tour to Sandhamn that provides a look at almost all the different kinds of islands except the outer skerries. Among other steamboats, the Blido-sund (1911) does five evening trips a week from Stockholm, with jazz, blues and soul music on board; the Bjorkfjarden (1925) goes out three evenings a week with a jazz band and stops at one of the islands for dancing on the landing-stage, a popular island tradition. Perhaps the best way to travel around Stockholm's archipelago is on a small yacht. There are plenty of excellent, wellprotected natural harbors, and the allemansratt ("public right"), an unwritten law, allows public access to private land and water: Anybody can moor a boat on almost any island, even pitch a tent there for 24 hours. (Private gardens, cultivated land and private landing-stages are excep-tions to this rule; otherwise practically all the countryside in Sweden is open to any-one.) This public right entails certain obligations: Littering or damaging the countryside is prohibited. An alternative to cruising or sailing around the islands is kayaking. Last summer a group of nine - a Stockholm woman, three Swedish students, a Seattle couple, an English chemist, a Swedish doctor and myself — were led on such a trip by a guide from a Stockholm travel agency. Because the kayaks could be maneuvered Continued on page 9

Stockholm. The central parts of Sweden's capital are built on the innermost islands. From there the archipelago fans out toward the Baltic Sea. Years ago hundreds of small boats came into Stockholm from the outer islands every day to sell fish. Now municipal "bus boats" depart for the archipelago from the center of the city, right outside the royal castle and the opera house.

by Jeppe Wikstrom

The islands near Stockholm are virtual suburbs, densely populated and connected to the mainland by bridge or car ferry. Other parts of the archipelago are unin-habited and among the wildest areas in Europe. Some of the islands, forest-clad, rise high above the sea; others are low, naked slabs of rock called skerries. On some it takes several hours to walk from one end to the other; some you could swim around in a minute.

There are relatively few tourists in the archipelago even at the height of summer. There are many summer houses, charac-teristically painted red, and in the vacation month of July the waters teem with yachts. Yet there are no chartered buses, no bars or souvenir stands. The Swedes are protective of this island heritage.

Until recently there were not many opportunities for visitors to sample the plea-sures of the archipelago, but in the early 1980s a modest and discerning type of tourism started to develop. A prime example is the Coast Line shipping company's one and only boat, the Utskar. On a 12hour day trip through the outer islands, from Nynashamn at the southern tip to

SHOPPING

Kayaks enable visitors to navigate shallow waters.

Norrtalje about 30 miles (48 kilometers) north of Stockholm, the boat follows a route that seems to pass almost dangerously near skerries and reefs. This trip brings home the remarkable number of islands and skerries in the archipelago. In the course of a few minutes, we counted more than a hundred. Sometimes it seemed the boat had blundered in to a tangle of islands from which there could not possibly be

any way out. Other vessels also serve the islands. The Stromma Kanal offers a three-hour trip starting in Stockholm and sailing down canals through woods and farmland out to Sandhamn, one of the archipelago's liveli-est communities and the yaching center of the area. Most of the buildings are from the 18th and 19th centuries; small wooden houses are clustered together by the sea,

most painted red, some green and yellow. Quite a few have gingerbread details, with beautiful fretwork and glass-enclosed verandas.

Among the 10 or so small shops on Sandhamn are a good bakery and an arts and crafts center that sells first-rate examples of Swedish woodenware and textiles. such as key rings in the form of small blocks (\$10) and handknit sweaters (\$110). The most attractive articles are wooden duck decoys (about \$80), so popular they are often sold out by mid-July. There are two good restaurants on the island, which has been an important pilot station for

hundreds of years. Another island worth a visit is Bullero, one of the most beautiful in the outer archipelago, with splendid (though some-times slightly difficult) walks along the

ironbound shore with its round, smooth, rather soft-looking rocks. In the inner, forested areas of the island, a visitor might see one or two roe deer. A small museum shows life in the archipelago in bygone days, mainly through pictures. Though Bullero is a fair-sized island — it takes several hours to walk around it -ouly one family lives there permanently. You can buy smoked fish from them, but there are no shops or restaurants.

The best place to get an idea of farming on the islands is Angso. Pasture land, hay meadows and small patches of tilled land are surrounded by thick forests, and a few cows, untrammeled by fences, leisurely graze. Angso was designated a national park in 1909, the smallest of Sweden's 20 national parks and the only one in any of its archipelagos. The display of flowers in

n Dublin's Fair City, a Crafty Restoration

by Hugh Oram

UBLIN --- A revival in crafts has made Dublin one of Europe's most engrossing places to shop. Besides department stores, antique shops and art galleries, Dublin has many craft shops that have been developed in the past five to ten years, recalling ity's 18th-century splendor, when such skills were at their apogee. nee stories of shops and craft workplaces, 65 in all, form a quadrantround an enclosed courtyard at the Powerscourt Center in South iam Street, near Grafton Street. Originally Lord Powerscourt's town re, built in 1774, the building was a clothing warehouse in recent years has been restored. Jewelry, leather goods and glassware decorated by intaglio method are some of the lines created here. Copper Craft es individual letters in copper from the Book of Kells (the original be seen just down the street at Trinity College) for 16.50 Inish pounds

lost of Dublin's interesting shops are within a half-mile radius of ity College, but one mile (1.6 kilometers) away, the IDA Enterprise ter in Pearse Street (tel. 775-655) welcomes visitors to its many small unaking places.

t a new shop in the Guinness brewery complex, also about a mile the city center, a whole range of Guinness-branded products is sold, ading T-shirts (4.95 pounds), beach towels (6.85 pounds) and an kely Guinness hip flask (15.25 pounds). The adjacent bar serves the draft Guinness in Dublin - free.

he recent vitality in crafts has produced many other unusual items. Best of Irish shop at the Westbury Hotel (791-233) has models of the lish telephone boxes, in green and cream color, for 7.20 pounds.

U

Rummaging in quayside shops is rewarding

Many of these lines carry the waver's name, a refreshing throwback in an automated era. At continier shops like Ib Jorgensen, 53 Dawson Street (718-111), prices can be higher: an Irish linen blonse, for example, at 186

Dublin has about 70 antique shops and more than 20 commercial art pounds. galleries. Along the River Liffey, rummaging in quayside shops is rewarding for both anniques and secondhand books. Recently at Edward

Fergus O'Farrell, 60 Dawson Street (770-862) has lifesize models of Irish sheep with detachable, washable fleeces for 175 pounds. O'Farrell also has miniature vinyl Dublin coal hole covers at 2.99 pounds; they make ideal place mats. Kilkenny Design Shop, Nassan Street (777-066), has long been a showplace of Irish goods, from glassware and pottery through clothes. It has lambswool skirts for 48.80 pounds. The long-established Woollen Mills, by the Ha'penny Bridge over the River Liffey (770-301), has a wide

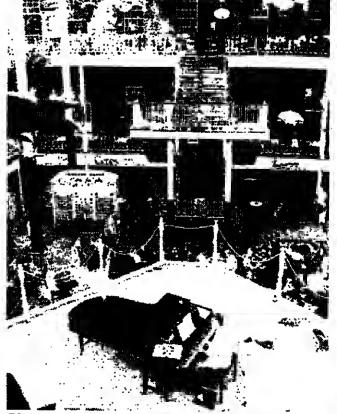

produced by Cuala Press, run by Anne Years, daughter of W.B.; these charming prints are reasonably priced at about 8 pounds. At the Gallery of Photography, 37 Wellington Quay (714-654), prints and posters of old photographs of Dublin and Ireland start at 3 pounds. At the National Gallery shop, Metrion Square (608-533), framed prints from the collec-tion run from 13.95 pounds to 40 pounds. The 1987 calendar featuring gallery works should be ready soon for 5.95 pounds.

Books on Irish topics have become numerous in recent years. The best range of tweeds for women, including skirts at about 50 pounds, and (Clare Street), Hanna's (Nassan Street), Hodges Figgis (Dawson Street) fabric lengths; men's Donegal tweed jackets range from 75 to 105 pounds, and the Paperback Center (Suffolk Street).

is 101 pounds. Men's handwoven wool sweaters are 36 pounds. Some

Four major department stores have feasts of Irish shopping: Arnott's Belleek pottery is modestly priced, such as a salt cellar at 6.90 pounds or (Grafton Street), and Henry Street), Brown Thomas and Switzer's (both an ashtray at 15.50 pounds. A set of six Irish linen damask napkins is Grafton Street), and Clery's (O'Connell Street). Switzer's claims to have the world's largest display of Waterford glass.

USINESSMEN and other regular travelers who are unable to take advantage of many low fares within Europe because of special booking conditions are being exploited by the state-owned and dominated airlines, which charge excessive fares on busy routes," says Michael Bishop, chairman of British Midland Air-ways. "We don't actually think it's right that these people who produce our bread-and-butter business should be asked to crosssubsidize the tourist. That's discriminatory."

So on June 29, British Midland introduced a low-cost, high-quality service between Heathrow and Schiphol, with a businessclass fare 20 percent below that of its com-petitors, British Airways and KLM. (British Midland is also the only European airline to run its own frequent-flier program.) As forces finally gather in Europe for what

is proving to be a watershed year in airline liberalization, independent airlines such as British Midland, British Caledonian and Virgin Atlantic, and even some charter operators, are leading a breakthrough to lower

EC deregulation: 'An explosive situation."

fares for business as well as leisure travelers by challenging the monopoly of state-owned

carriers on some routes. Butish Midland keeps it simple on its new service to Schiphol; you get business-class service however much you pay, and there are only four fares instead of the usual dozen; A normal business-class one-way ticket costs £69 (\$104) compared with £85 on KLM or BA; a same-day round-trip costs £119; a one-way "late saver," bookable within 48 hours of departure, costs £39; and a conventional PEX ticket costs £69.

British Caledonian's Time-Flyer fares (the tariff depends on the time of day you fly) between Gatwick and Schiphol, Brussels or Frankfurt can save up to 50 percent of nor-mal economy fare. You can change your return flight if you upgrade to a more expensive time segment; you must stay a minimum of one night but it need not be a Saturday.

Virgin Atlantic has an unrestricted oneway fare of £35 between Gatwick and Maas-tricht in the southern Netherlands (convenient for Brussels, Cologne, Eindhoven) and is looking at similar cut-price services to other destinations.

Nouvelles Frontières, France's secondlargest tour operator, runs a "scheduled" charter flight (operated by British Island ways with a BAC111) between Orly and

possible through the erosion of European protectionism by a series of liberal bilateral agreements in the last two years between Britain and the Netherlands, Luxembourg and Beigium — allowing designated airlines to fly any routes between the two countries at any fares and any frequency — and by a recent threat by the EC Commission to take national airlines to court unless member states make significant progress toward liberalizing air transport.

This threat followed a ruling by the European Court of Justice in April (a test case in which Nouvelles Frontières was taken to court for discounting) that effectively out-lawed uncompetitive price-fixing by airlines. Nobody expects deregulation to happen overnight, but there is a groundswell of reform that may lead to confrontations between protectionist governments — such as those of Spain, Italy, Greece, West Germany and possibly France — and independent airlines and charter operators. This in turn may lead to further EC rolings.

"Nothing much will happen until the Council of Ministers' meeting in Septem-ber," said Christian Pinot, international director of Nouvelles Frontières, "but it's an explosive situation."

explosive situation." "The climate is changing," said British Midland's Bishop. "There's a very strong grass-roots feeling by people that they are being exploited by the airlines. If'll take time, but when the walls start to crack, I think they'll crack quite quickly.

Bishop said he expected two things to happen on the Heathrow-Schiphol route: BA and KLM will reduce fares and traffic will grow. "After we came in to compete on Glasgow and Edinburgh, traffic went up by 35 percent in three years," he said.

British Caledonian has had a similar experience, especially on its service between Gatwick and Amsterdam and Brussels where it operates its Time-Flyer fares. Michael Bathgate, B-Cal's general manager for Europe, said: "We started on Brussels last December as soon as the Anglo-Belgian air-service agreement was liberalized. Since then we've seen a 50-percent growth in our pas-sengers. Interestingly enough, by no means all of it has come from Sabena and BA. We've generated a lot of new business from the ferry and jetfoil." He said he believed about half this growth represented business

passengers. Time-Flyer is an imaginative system. Fly ing from Gatwick to Brussels, for example you can do a round trip for £90 (business class costs £178) if you depart and return on the off-peak lunchtime flights. If you want to come back on a peak morning flight, you can upgrade for a total cost of £108 pounds.

Not surprisingly, B-Cal is meeting resis-tance to Time-Flyer on Europe's more pro-tected routes. "We just have to keep chipping away," Bathgate said. In France, Nouvelles Frontières is chip-

ping away on charter routes to Frankfurt, Geneva and Rome, so far without success The climate in France may however be changing; early this month, Air France lost its monopoly on flights to French overseas territories, an opportunity Nouvelles Fron-ticres was quick to exploit. "We have created a business department with the aim of providing business traffic with lower fares than scheduled airlines and without restrictions," Pinot said.

Men Watch, Women Work in Yunnan

by Kate Singleton

UNMING, China - The billionstrong population of China is 93 percent Han Chinese, but the re-**1** maining 7 percent is made up of 55 national minorities, some of whom wear their national costumes and, to the careful observer, have features distinguishable from those of the Han. They can be found in half of the Chinese-controlled territory, mostly in the sensitive border regions. One such region is Yunnan province, which borders Laos in the south, Burma in the west and Tibet in the BOTTh.

Knuming is the capital of Yunnan. It is a long train ride from anywhere. If you ap-proach Kumming from the southeast you will probably find yourself sitting up on a wood-en seat for 36 hours at a stretch, because the train set out from Shanghai and there are no more couchettes available.

Chinese trains do not have classes but categories; hard and soft. The hard sleepers consist of rows of rudimentary couchettes in one long carriage with a corridor down one side. This is obviously less comfortable, but it is cheaper and interesting. You are likely to meet people who are teaching themselves English and would like you to correct their homework, for instance. Others may play chess with you - a great attraction: the Chinese love watching contemplative games.

The city is at an elevation of 1,890 meters (6,160 feet), and the weather is pleasantly

In the park at Kumming. Kone Sugaron

You will also find a China Travel Service desk there for plane and train reservations. This will save you queuing at stations and CAAC offices.

So off you pedal, and now it is your turn to do the staring: signs depicting a toothy month to advertise a dentist's shop where passensby can admire the practitioner's skill with a pair of pliers; little old ladies with bound feet in their tiny slippers; women wearing bright blue turbans, and others with

There are various parks and temples to visit within a 15-kilometer or 10-mile radius of Kumming. Take local buses rather than on guided tours. If you have the energy, there is nothing to stop you making your way there by bike.

If you have a week or more to spare, go to Dali on the west side of the province. Here you can walk on the Cangshan mountain or rounding villages. Getting there is a bit of an undertaking, however. There are two daily bus services, both from the same depot in Kumming. You can choose between a huge old-fashioned coach and a sleek new Nissan minibus that is more expensive but quicker. The journey is across three mountain ranges with extraordinarily varied vegetation though you may not always find it easy to concentrate on the scenery; in the big buses, people are sometimes carsick, and in the minibuses the driving can be unnerving on mountain bends. The unwritten rule seems to be that the newer the vehicle, the more ight of way the driver has. You can only hope that drivers from the opposite direction. can judge the newness of an out-of-sight Nissan by the sound of its horn.

Dali is a tiny town that is the administra-tive center for a fairly large area. It is at almost 2,000 meters, more or less where the great Yunnan-Tibet and Yunnan-Burma highways meet. In the past it played an important role in exchanges between China, and southeast Asian countries.

There are two things in Dali that you will

black and white paintings of local son Grey marble is also used for corners and detailing. The word sall means min There is a lot of it on the nearby hills which ring with the sound of hummen ing stone.

In the surrounding countryside you see people heaving great humps of ma ing sites. On the lake side of the road, w the earth is richer, farmers hoe and de harvest by hand. end of the 16th century. Like most of the palaces, it is not open to the public, but its magnificent gardens, with their statuary, fountains and grottoes, can be visited on weekday mornings. Villa Torlonia, with its lovely "water theater" designed by the Re-naissance architect Carlo Madema, is now the town park, Villa Falconieri was built in 1545 for Bishop Alessandro Ruffini and later enlarged under the direction of Borromini. The 16th-century Villa Tuscolana, also known as Villa Rufinella, was once owned by the royal family of Sardinia. The spacious Villa Mondragone, built in 1573, is owned by the Jesuits. The Frascati Duomo, or cathedral, in Piazza San Pietro, has a facade by

Girolamo Fontana. The three-towered castle

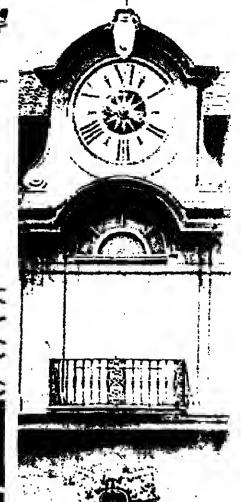

in Piazza Paolo III is now the bishop's pal-From Frascati it is a short ride to the

meager but suggestive ruins of Tusculum, which was probably settled by the Erruscans but according to legend was founded by Telegonus, son of Ulysses and the sorceress Circe. A few kilometers away is the Calmaldoli hermitage, founded by Pope Paul V in 1611. The road continues to two smaller Castelli: Monte Porzio Catone, where Cato is said to have had a villa and where the entrance to the town is through a monumental doorway in the old Borghese family palace; and Monte Compatri, which also has a Borghese mansion, now the city hall, Behind it is a network of medieval streets.

Midway between these two towns a road to the north leads to Colonna, the smallest and northernmost of the Castelli. The main road leads to Rocca Priors, at 768 meters (2,500 feet) above sea level. The lookout point in front of the medieval castle, which belonged to the Savelli family, gives out over the campagna and the wooded slopes of Mounts Artemisio, Tuscolo and Cavo.

Heading back to Rome, the road passes through the delightful town of Grottaferrata, whose abbey was founded by a Greek-rite Basilian monk, St. Nilus, in the late 10th century and fortified in the 15th by Cardinal Giuliano della Rovere, later Pope Julius II. An abbey museum is open in the mornings and late afternoons. Several times a day the

HE Utskar, tel. (8) 24 94 70, plies the outer skerries Tuesday and Friday, June 4-Aug. 27. The trip costs about \$35. Its restaurant serves a mer houses in the islands for \$190 and up a week (but be warned, many are a long way from the water). Boat trips to the national park on Angso run twice a week for \$4, private trip for \$26, from Vettershaga, which is reached by bus; tel. (176) 643 25. limited menu of excellent archipelago cuisine, with dishes such as smoked fillet of cod or smoked salmon; main courses from about One can charter a yacht with skipper through agencies such as Swedyacht Char-ter, tel. (766) 459 20. Cost, from \$900 a week \$10 to \$12. The boat's schedule is designed so that one can disembark at any stop and

return to Stockholm on a bas boat. The Blidosund (11 71 13) has tours with music Sunday through Thursday, June 10-Sept. 4, for \$8; buy tickets a week in advance for this or the Bjorkfjarden. Dinner for two, with wine, about \$55. Main dishes include pork tenderloin, grilled spiced salmon, steamship steak. Tables must be booked in advance.

The Bjorkfjarden (23 33 75) makes trips with jazz and dancing Tuesday through Thursday, June 24-Ang. 21. for \$9. Dinner for two with wine, about \$55. Main dishes include fried sole or plaice, fillet of reindeer with fried mushrooms. An excellent herring platter is among the appetizers. Booking a table ahead is recommended.

Lunch cruises on the Storskar are Monday through Friday for \$4. The Norrskar makes day trips to Sandhamn daily for \$8. No booking for these boats, but tables can be reserved (20 91 96). The food varies; the best bet is steamship steak, \$11.

ing, which is recommended, is through each hostel. Fjardlang, tel. (750) 508 00; Moja-(766) 643 12; Galho (766) 661 17; Stora Boat trips to Bullero cost about \$11. Museam open daily, June 9-Aug. 22; admission free. Day tours to Sandhamn via canal cost \$10. Both can be booked through Stockholm Information Service (Sweden House, Kunginformation Service (Sweden rouse, Andg-stradgarden, Box 7542, S-103 93 Stockholm, tel. 789 24 17). At Stockholm Information Service you

can also buy Waxholm Co.'s interskerry tickct for \$15, good for two weeks of unlimited travel on more than 20 routes, or reat sum-

bearded monks say Mass in Greek in the church of Santa Maria, which was consecrated first in 1025 and whose 13th-century Byzantine mosaics share the aisles with 18th century winged angels. The Chapel of St. Nilus has 17th-century frescors by Domeni-

If you intend to see the entire region in one trip, from Grottaferrata to Marino or Rocca di Papa you can pick up the Via dei Laghi and continue to the other Castelli. If you are setting out from Rome on a separate occasion, take the Via Appia Nuova out of the city to the turnoff on the left a short way past the Ciampino Airport.

Marino is a pleasant hill town, controlled during the Middle Ages by the Orsinis and then the Colonna family, whose mansion is the city hall. The town has a couple of interesting churches, one of which, the church of the Trinità, has a painting attributed to Guido Reni. But it is best known for its wine festival on the first Sunday of October. when the town fountains run with white wine rather than water.

The road continues to climb, skirting Lake Albano, an extremely deep volcanic lake that was another site of imperial Roman vacation villas. An intersection to the left leads to the highest of the Castelli, rocca di Papa, built into the side of Mount Cavo as a 12thcentury papal defense post. A signpost lead-believed to have been built over the Casta ing to Campi d'Annibale refers to what is Albana, the camp that the Emperor Septi-

nizes weekly kayaking trips, from early June

"Porchetta" is a specialty of the region.

supposed to have been a camping spot for Hannibal's armies as they prepared in 211 B.C. to march on Tusculum and Rome.

The lake road continues to Nemi, a tiny town perched far above a smaller volcanic lake with a ninth-century castle, previously a stronghold for the Tuscoli counts, the Orsini and the Colonna, and now property of the Ruspoli. The town is known largely for its wild strawberries; there is a strawberry festival each spring. Nemi has ancient roots; the shore of the tiny circular lake, known as the Mirror of Diana, was the site of a temple to the goddess. Continue around the lake to Genzano di

Roma, south of which is a turnoff for Lanuvio, resettled in the 11th century by Benedic-tine monks after centuries of decline. Parts of the medicval town, including a small Co-lonna palace and a fortification tower, remain. On the way back to Rome the Via Appia passes through Genzano, founded by Cistercian monks and best known for its infiorata, a festival on the Sunday after Corpus Christi, when the road to the cathedral is carpeted with religious portraits made out of flower blossoms.

Albano Laziale is a large, bustling city

mius Severus built for the Second Roman Legion in 195 A.D. There is an ancient Roman cistern still in use. The medieval Santa Maria della Rotonda was built on the site of the nymphacum of Domitian's villa. Over the hill from Albano is Castel Gandolfo, overlooking Lake Albano. On the site of Alba Longa, which legend says was founded by Ascanius, son of Aencas, its original castle was built by the Genoese dukes of Gandolfi but later passed to the Savelli. The town is best known as the summer residence of the pope, a tradition that began when Urban VIII had it rebuilt in the early 17th century. The loggia and the sca-lone (staircase), added by Alexander VII, were designed by Bernini, as was the nearby church of San Tomaso di Villanova and the fountain in front of it.

Most exciting perhaps for history lovers is Castel Gandolfo's emissarium or lake outlet, a 1,400-foot passage tunneled out of solid rock to keep the water level constant in the spring-fed lake. The runnel was built by the Romans, possibly as long ago as 397 B.C., and still serves its original purpose.

Mr. Alfonsin, for example, is trying to lure back oil companies that were ejected from the country two decades ngo. And this week, he visited Japan

in an effort to attract investors to Argentina. Skeptics, including Enrique Szewach, a respect-ed economist, question Mr. Alfonsin's commitment to changing Argenting from an inward-looking economy to a competitive one.

Indeed, most of the moves so far appear to be symbolic. The country is not planning to sell most of its biggest and costliest public companies: com-munications, utilities, the railroads and petroleum. The biggest single expense item in this year's budget, for example, is the subsidy to the railroad industry.

"It is not possible politically to sell them today," said Roberto Lavagna, secretary of industry and

Unemployment In Britain Rises Reuter LONDON - Unemployment in Britain rose a seasonalty adjusted 15,000 in June to n provisional total of 3.22 miltion, or 13.1 percent of the adult work force, the Employment Department said Thursday. In May, unemployment rose 5,200. The May increase had originally been provisionally put at 5,600. The unadjusted jobless total, meluding school leavers, fell 42,000 in June to 3.23 million, but was 51,000 higher than in fune last year. Seasonally adusted, unemployment totaled 3.12 million in June 1985. In the recent data the government ininded self-employed for the first time, giving a broader work force base for calculating the

nonneed his resignation on the same occasion. Mr. Davies, who has headed Hong Kong's largest ing of assets at Jardine Matheson & property company since mid-1983, Co. this week marks a significant is credited with reviving it from a step in the British trading house's effort to withdraw from Hong Kong, according to analysts and executives in the Jardine group.

shareholder in the newly independent company. The share fifter is to be "approximately equal to Dairy Farm's book value," Mr. Keswick said.

"In effect, lardine is gaining di-rect control of a very profitable company without paying a premi-um for it," said Carlton Poon, research director at Vickers da Costa & Co.

In explaining the proposal, Mr. Keswick emphasized that Dairy Farm, a food producer and retailer, is better placed as part of the Jardine trading empire than as a division of a property and hotels con-

"Dairy Farm is a goodwill busi-ness embedded in an asset business," Mr. Keswick said in an interview Thursday. "Jardine has a great deal of experience in both marketing and distribution."

But executives associated with the company acknowledge that taking control of Dairy Farm is part of Jardine's long-term strategy to reduce its exposure to property and other fixed investments in

Hong Kong. Jardine, the most prominent of the territory's old-line British trading houses, or "bongs," announced in 1984 that it would shift corpo-

rate headquarters to Bermuda The move prompted continuing speculation that Jardine is preparing to "run down its local operations," as one financial analyst said, in view of China's assumption of sovereignty over Hong Kong in

A key part of this strategy ap-pears to be the sale of Jardine's

FOR PRIVATE BANKING IN SWITZERLAND, AN EXCEPTIONAL BANK

DEVELOPMENT

BANK

An American Express company

As the sixth largest commercial bank in Switzer-land, TDB offers a full range of sophisticated private banking services, from fiduciary deposits to asset management. We also give you the personal attention that can be so important to international clients.

Furthermore, as part of American Express Bank Ltd., private banking at TDB includes a number of unique benefits. Through this global link, our clients have access to the special investment opportunities offered by the American Express family of companies - world leaders in the financial services field.

For certain clients we also provide American Express Bank Gold Card® privileges and our ex-

clusive Premier Services,54

for round-the-clock personal and travel assistance. While we move with the times, our traditional

policies do not change. At the heart of our business is the maintenance of a strong and diversified deposit base. Our portfolio of assets is also well-diversified, and it is a point of principle with us to keep a conservative ratio of capital to deposits and a high degree of liquidity - sensible strategies in these uncertain times.

TDB: an exceptional bank for the man with exceptional goals. Visit us on your next trip to Switzerland. Or telephone: in Geneva, 022/37 21 11, in Chiasso, 091/41 22 22.

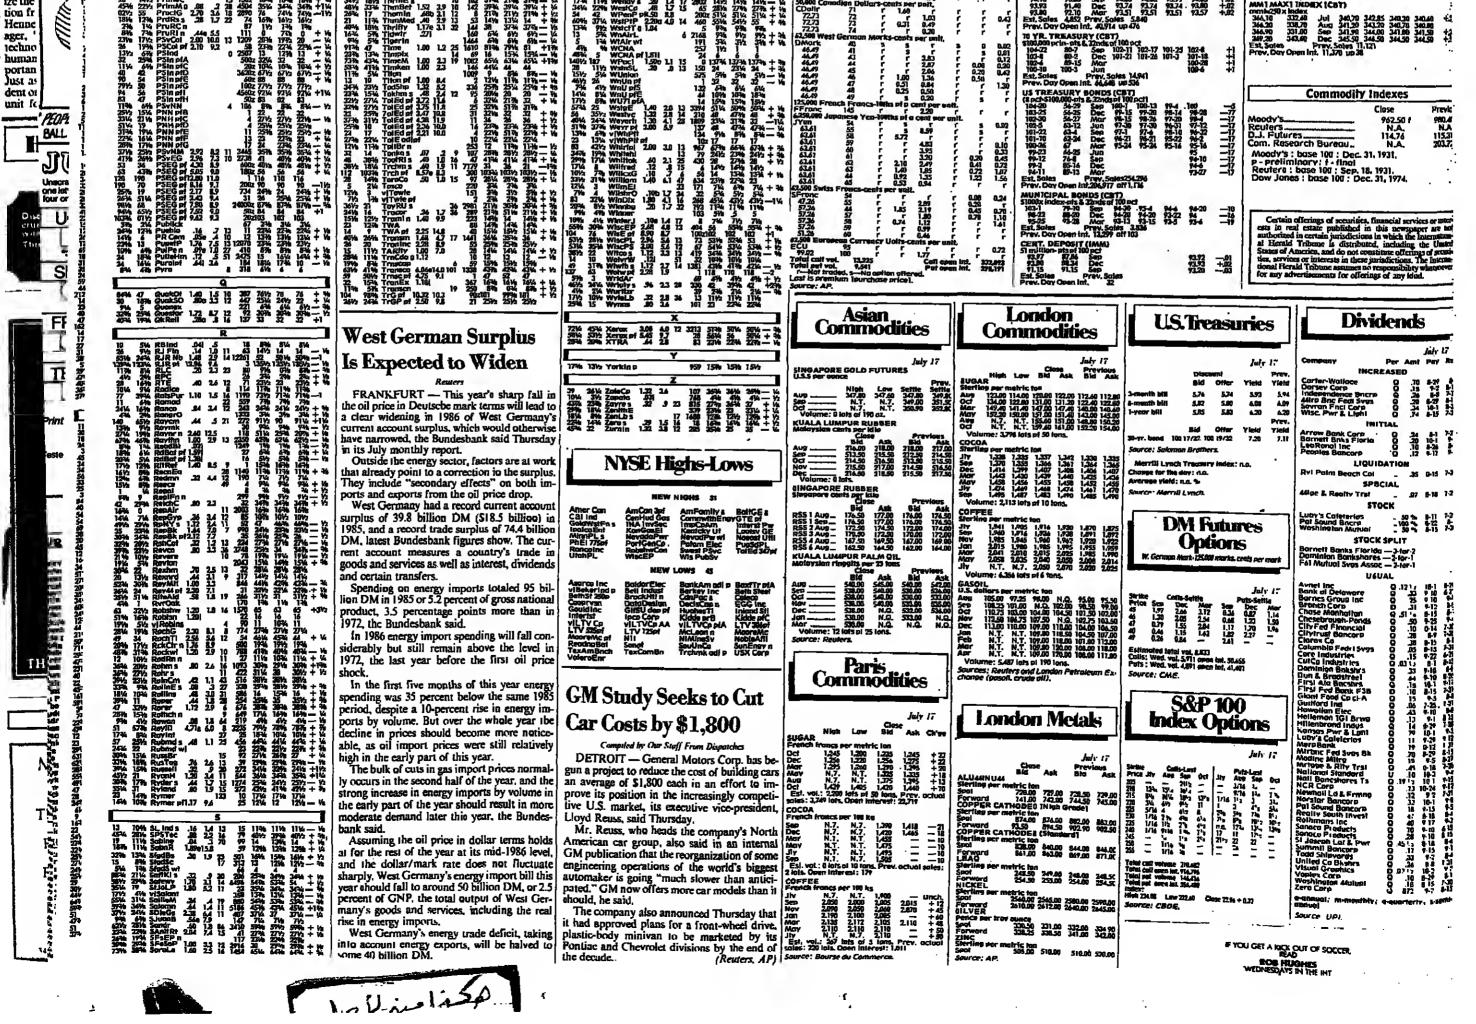

TDB is an affiliate of American Express Company, which has assets of more than US\$70 billion and shareholders' equity in excess of US\$5 billion.

Trade Development Bank bead office in Geneva, 41 96-98, rue du Rhône.

The issue will effectively the newly listed company. "Both botels and wery good shape," N with numerous local and overseas companies over the past year, without reaching an agreement on the price of Land's shares.

Company officials suggest the same motivation has prompted Mr. Keswick to separate Dairy Farm from Land's asset-heavy botel and property divisions.

"He's mainly interested in current-asset rather than fixed-asset businesses," said a senior executive of the group, who did not wish to be identified. "You can draw your own conclusions as to why."

Financial analysts see the outlines of Jardine's long-term goals in a number of transactions initiated in recent months.

Earlier this year the company acquired a California insurance brokerage, Emett & Chandler Cos. Inc., for \$62 million. The price was almost a fifth of the capital employed by Jardine outside its Hong Kong Land holdings.

by about 20 percent. Mr. Keswick suggested in the in-

terview that the hotel division of Kong Land shares ended Thursday Hong Kong Land, Mandarin Ho- at 5.85 Hong Kong dollars (75 tels Ltd., may eventually be trans- cents), o decline of 10 Hong Kongformed into o services company by cents. selling off its underlying properties.

Iling off its underlying properties. The Dairy Farm transaction is "We haven't made up our minds also expected to enable Hong Kong yout hotels," Mr. Keswick said, Land to reduce its debt by about about hotels," Mr. Keswick said, "If we want to restructure it to 1.5 billion dollars. become more of a management company, then it might also bethat in the long run the separatioo will weaken a complimentary struc-ture that was a key feature of the come independent,"

over his own government, he must also deal with powerful interest groups, including labor unions and nesses, that are accustomed to manipulating the state for their own ends and will resist change, according to Charles Rowe, a top official with the Bank of Boston in Buenos Aires.

Over the last half-century, Mr. Rowe said, the government has cre-ated a number of private fieldoms for individual businesses by providing tax breaks, interest subsidies or other benefits that make it virtually impossible for other companies to enter a particular industry. Government regulations also stifle entrepreneurial activity. For ex-

ample, the law requires that pharmacies be owoed by the pharmacists. "That prevents a sharp businessman from hiring a couple of druggists and starting a chain, or a supermarket from adding a drug counter," he said. The public sector has grown

Outside the energy sector, factors are at work that already point to a correction in the surplus. They include "secondary effects" on both im- ports and exports from the oil price drop. West Germany had a record current account surplus of 39.8 billion DM (\$18.5 billion) in 1985, and a record trade surplus of 74.4 billion DM, latest Bundesbank figures show. The cur- rent account measures a country's trade in goods and services as well as interest, dividends and certain transfers.

BOOKS NO, HE CAN'T REMEMBER HOME: A Short History of an Idea WHERE THE CHURCH IS ...

By Witold Rybezynski, 256 pages. \$16.95.

Viking, 40 West 23d Street, New York, N. Y. 10010.

Reviewed by Jonathan Yardley

" HE idea of "home" --- "the house, but also L everything that was in it and around it, as may seem as old as the hills, but as Whold Rybczynski demonstrates in this exceptionally interesting and provocative book, it is a relatively modern notion that did not really begin to take shape until after the Middle Ages. It is also an idea, in Rybczynski's idiosyncratic but highly persuasive view, that has been altered and endangered by contemporary architecture and interior design, which have abandoned traditional ways of creating comfort in order to place principal emphasis on artistic appeal.

Comfort: the word occurs over and again in this study, for if the book is a history of "home" in the Western world it is also a meditation on the meaning of comfort, which Rybczynski heard mentioned only once in his six years of architectural study yet which he correctly regards as the key to our feelings about the buildings in which we live. It proved a more complicated and elusive inquiry than he had at first imagined, but eventually Ryb-czynski concluded that "domestic comfort involves a range of attributes - convenience, efficiency, leisure, ease, pleasure, domesticity, intimacy and privacy - all of which contribute to the experience." In the course of his brief yet highly informative analysis Rybczynski shows how all of these attributes evolved over centuries, combining to create a sense of "home" that we take entirely for granted yet that would have been unimaginable 500 years ago.

To begin with, in the Middle Ages the vast majority of people did not live in houses, they lived in hovels. Even the bourgeois, upon whom Rybczynski concentrates, lived in a way that most of us would find deeply offensive: "The medieval home was a public, not a pri-vate place. The hall was in constant use, for cooking, for eating, for entertaining guests, for transacting business, as well as nightly for sleeping." It was a place in which no one could be comfortable, as we now understand that word, not merely because the benches and beds were hard but because "comfort" was simply not an objective of medieval society.

Frank Conner: The man to beat

regaining yachting's holy grail. Months before the finals, the Conner campaign seems to be unstoppable. He is campaigning two of the world's fastest 12-meter vachts in straight-line trials upwind and down, and then ne trials upwind and down, and then head-to-head, in ferocious duels over a simulated 24.5-mile (39.4-kilometer) America's Cup course. Both bosts appear to be exceptionally fast in heavy conditions, and eir crew work, even at this stage, is as flawless as the nate cup contender's must be

Both yachts bear the name Stars and Stripes. That underscores the sense of emphatic national purpose that lies behind this attempt — one of six from the United States — to erase the painful memory of that day in September 1983 when Australia II ended 132 years of American dominance - the longest winning streak in sports history. For Conner, 43, the man acknowledged as the

world's finest, most experienced 12-meter helms this is, in his words, "a chance to show the kids who's boss." Having lost the cup, he wants it back.

Apart from Liberty, Conner will have had a fleet of four from which to chose. The trials off Hawaii are determining whether he and his squad of 60 men bring two or three yachts to Fremantle at the end of August.

Because Conner's campaign is recognized as the one to beat, he has been plagned by video camera-toting spies, including Australians who have hovered close to for his boats in helicopters or bounced around at sea in rubber runabouts, trying to discover his secrets of hull and sail design. Councr said he is aware that the spies have included such key Australians as Kookaburra skipper Iam Murray, Bond syndicate sail coordinator

Tom Schneckenberg and tactician Hugh Trehame. "We know when they're coming," he said, "so we put on a bit of a show for them. We wear our old sails and we goof off, dropping things in the water and wasting time. We show them nothing, so they go away thinking, 'Dennis isn't going to he any kind of threat.' Only we know how good we really are. Those gays will have to wait until they face us on the line off Fremantle, and by that time it will be too late."

Conner has been forced to employ a number of counterespionage techniques. All his boats, with the exception of Liberty, have identical sail numbers, 12 US 55. Their long, grey-blue hulls, at least above the waterlines, are so similar that even the crews sometimes find it hard to tell them apart. Below the waterlines, in a blue that blends with the

sea, are the winged keels that they have been testing in Anstralians won, he said, because they had a-Hawaii for months. The boats, secured inside barbed wire-topped perimeter feacing at the University of Hawaii's marine research facility, are protected rding to Conner's test manager, Robert Hop- around the clock by armed guards. All visitors are e former coach whose U.S. yachting team won subject to security checks. Conner has set up an elaborate intelligence network -iver medals and four golds at the 1984 Olym-Tix monner believes that Sail America can emulate that apparently includes Oahu's eight air charter operators and the immigration authorities at Honolulu International Airport, who tip him off when spies heave into view. He acknowledges, but does not really care, that the resounding success of his obsessive approach has rai-hed vitriolic critics, including disgrantled rivals and writers who often find him cold and aloof. He has been attacked as a spoilsport and a workaholic who has turned the world's most glamorous amateur yachting event into a professional grind. In reply, he says that he has never heard of anyone being criticized for the pursuit of excellence. His own undoubted excellence, reached long ago, continues to be held with single-minded determination. Nothing and no one is allowed to get in the way of winning. ia II-style breakthrough, Conner is convinced is 't of his new boats would "murder" Anstralia II is 't of his new boats Conner is obsessive often to the point of being rude people see. If one can get beyond the initial barriers, the tension, the frosty indifference, the dark suspi-ciousness of Australians and journalists, there can be nas occn supersedent by the current world on Australia III; Lexcen's latest, Australia IV, "launched on Ang. 1. "and intelligence, acutely conscious of his humble be-sight Conner must first defeat 13 tough inter-'invals, he almost certainly will be the 1987 cap 'ar And his unprecedented campaign will, if it hecked by the Australians, likely result in his

OREBOARD

U.S. Boxer Is Reinstated, Defeated

MOSCOW (AP) - The U.S. boxer Harvey Richards, who said he had lost his motivation to continue fighting in the Goodwill Games after being disqualified by a Soviet referee, was reinstated Thursday.

SPORTS BRIEFS

A four-member competition jury — a U.S. team manager and three Soviet officials — ruled the fight a no-decision. Their ruling was approved by the president of the International Amateur Boxing Association, but later in the semifinals Richards was stopped at 1:06 of the third round by Andrei Karavaev of the Soviet Union.

Referee Yuri Frolov had disqualified Richards, 22, a light-heavyweight, for a low blow during the second round of his quarterfinal bout Tuesday against Nils Hausgaard Madsen of Denmark.

Ruttiman Wins, Hinault Retains Lead

BLAGNAC, France (UPI) - Niki Ruttiman of Switzerland barreled ahead Thursday to win the 154-kilometer (95-mile) 14th stage of the Tour de France bicycle race, with La Vie Claire teammate Bernard Hinault of France retaining the overall lead. stop returned to their condomin-

Greg LeMond of the United States, another member of La Vie Claire, remained second overall but cut Hinault's lead to 34 seconds by winning a bonus sprint. Ruttiman, 24, a team climber, covered the mainly flat stage from Luchon to Blagnac in hot, burnid weather at a speed of 40.57 kph, finishing in 3 hours 47 minutes 44 seconds.

Don Johnson? No Sweat

By Russell Baker

NEW YORK - My daughter, who loves me, wanted me to dress like an actor named Don Johnson, who plays a policeman in the television show "Miami Vice." which I saw once. There was a great deal of gunplay. It reminded me of a Randolph Scott movie I saw in 1938 in which maybe 30 armed horsemen trapped Scott in a narrow canyon and emptied dozens of pistols and rifles in his direction police suit. without effect until their leader said, "No use wasting any more lead on him, boys," and everybody galloped off leaving Scott unshot.

والممت بمصيرة المتصابينات المربان أأراقهم

Same thing when I saw the "Miami Vice" policemen vainly pumping thousands of bullets toward G. Gordon Liddy, who was making a getaway aboard a neat-looking powerboat. Silly, I thought. G. Gordon Liddy, in case you were born yesterday, was one of the first people to get caught in the Watergate affair. Much as I admire him, getting away unscathed is not one of his talents. Π

So when my daughter, out of love, brought me this Don Johnsoo police suit, I had to exercise terrific self-control so as not to say, "These are silly clothes fit only for a show so silly that the cops can't even catch poor old Gordon Liddy."

"Gosh, I've always wanted a Don Johnson 'Miami Vice' police suit," was what I said, slipping into the white jacket.

Did I mention the outside temperature at this point? It was 98 degrees (36 degrees centigrade) and the humidity was 165 percent, just like Miami. As we were inside, it was hotter and stickier than outside because my son, the one who lives have done if he'd been our child --believes air-conditioning causes terminal lumbago, croup, quinsy and onsets of hlindness such as finished off Bette Davis in "Dark Victory."

I put on the white jacket. Wrong-Wearing an oxford-weave shirt ły, with a button-down collar and a British regimental necktie may get you past the security guards at Brooks Brothers," my daughter said, "but wearing them under a white Don Johnson 'Miami Vice'

police-suit jacket is simply not What is done is incredibly expensive: First, you remove necktie and shirt with collar. (I did so, noticing as usual that the collar was sweat-drenched, due to the Miamitype environment.) Then you put on sort of an undershirt with no collar, so that the hlotting duties Iormerly performed by the buttondown collar can be assumed by the white collar of the Don Johnson

lost art.

ASHINGTON — It is a

rare historic edifice in the

After I got it right, my daughter remained unhappy. "Somehow you still don't look like Don Joimson," she said.

Big deal. Don Johnson doesn't look like Randolph Scott, either. Don Johnson probably doesn't even know who Randolph Scott is. Don Johnson couldn't help being a kid, f couldn't help looking stooped and perilously close to the Bette Davis "Dark Victory" syndrome despite wearing a Don Johnson

"That's not the prohlem," said my loving daughter. The prohlem was that dark, spreading stain ruin-ing the collar of that once magnificently white jacket. "You must stop perspiring at once," she suggested. I told her even actors perspired

in tropical heat and humidity such as one encounters in the drug-infested Miami swamps and my parlor, and cited the Iantastic perspiring done by Edward G. Robinson in "Key Largo." Not Don Johnson, she insisted.

Even when its wearer was squeezing off 30 rounds per second in letid, mosquito-plagned swamps, Don Johnson's white jacket collar, though nestled charmingly against bare sweat glands, never showed the faintest trace of dampness.

The poor child didn't know that the Miami Police Department, being acutely image-conscious, provides each of its cops with a valet always at the ready with a van full of fresh white jackets during the most harrowing gun battles.

"Maybe if you let your whiskers grow," she said. "Don Johnson wouldn't dream of wearing his white jacket with a shaved face." Sweet child. How could I tell her that Don is so busy day and night changing into dry white jackets that he doesn't have strength left to lift his razor?

John Barianos in his studio: "I feel I create history and I feel proud."

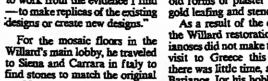

that were handcrafted centuries ago, freshening Irescoes and place of monumental and historic friezes with gold leaf, recon-structing coffered ceilings, mosa-ic floors, scagliola columns and buildings. He has never been at a loss for work; one commission has led to another, and he now ornate plaster work. Of more has more than 30,000 somare leet modern vintage, he has made arof studio space where his prototificial trees for the birdhouse at types and molds and castings are

> When Barianos is asked to make a restoration study, as he was recently in connection with restoration of the city's Beaux Arts Union Station, he makes a diagnosis of all the decorative features that have been destroyed or are broken and cracked and crumbling.

"My work is to bring back the beauty, to use the same tech-niques and designs," Barianos said in the office of one of his In the case of the 1901 Willard Hotel, an opulent Washington landmark that had stood vacant studios in Rockville, Maryland, a for 20 years and has now been returned to its former glory, cortiny room crammed with hunmoes and moldings were missing, interior walls and wood finish umns, statues, plaster murals and busts and piled high with books were warped and rotten, decorabearing such titles as "Minoan & tive surfaces cracked and Mycenaean Art" and "Roman chipped, and the magnificent marble-like columns with their Barianos arrived here in 1967 Corinthian, fonic and Doric capiat 32 years of age, with his wife, tals were decayed.

"It was a complete catastro-Vasilios, 9, and Theodosia, 4. phe," declared Barianos, who has just completed the 18-month task ol aothentically reproducing much of the decorative work. "And now it is a big difference. no?" he asked with a triumphant.

He came to Washington, he "What I do," he continued, "is

marble. For the steel and plaster columns, he covered them with the imitation marble known as scagliola, applying layers of plas-ter impregnated with color and other effects by virtue of a Barianos family secret formula that employs, among other ingredients, silk threads to imitate vein-

There are many secrets in this type of business, he explained, saying: "In the old time, each family would keep their own secrets. I leave all my secrets to my son.

Paul Childs of Harry Weese & Associates, one of the architec-tural firms working on the restoration of Union Station, says that Barianos, unlike many restoration contractors, is knowledgeable in a fall spectrum of restoration work.

"He has a great deal of knowledge about the sophisticated ar- ianos says of his work here: eas of restoration that we were running into at Union Station." Childs said, "knowing how to make scagliola, being capable of molding plaster, knowing how feel proud."

said, because he considered it a to work from the evidence I find old forms of plaster were made, gold leafing and stencil work." As a result of the demands of

the Willard restoration, the Barianoses did not make their annual visit to Greece this year. And there was little time, as well, said Barianos, Ior his hobby of flying soaring planes (he won an inter national competition in 1957 Ior keeping his craft aloft for more than two hours).

Although he hrings technicians from Italy and Greece to assist on such major jobs as the Willard, for the most part the Barianos studio adheres to the old world tradition of a "mom and pop" cottage industry with all four members of the Barianos family pitching in.

His wife produces molds and cast pieces as well as doing much of the gold leafing; his daughter translates the specifications of the job into English; his son, now 27, runs the company; and Irene Anthou, his son's fiancee, joins them in the studio each day.

Although they come from a part of the world where history and antiquity is measured in millennia rather than centuries, Bar-"These buildings represent the beauty of the old. I bring my eyes and my experience from Greece and f feel I create history and I

PEOPLE **Dogs** Outbite People

Dogs are still No. I when it dren's tree houses, said comes to biting people in New Schutte, the city zoning York, but people are No. 2. The trator. Health Department's annual sur-

vey reported that dogs bit humans 9,809 times during 1985, while humans bit each other 1.591 times. That at least is how many bites were serious enough for doctors to report them to the city, said Martin McGinley, a spokesman. The report said that while dogs inflicted more reported hites than any other animal last year, the total still was down 8 percent from 1984. Human hites were down only slightly, however, from a 1984 total of 1,593. Cats were third (879 bites), followed by wild rats (311), squarels (75) and hamsters (57). É

A British balloonist says he hopes to go around the world in 18 days next year in the first manned balloon flight to circle the globe. "It's the ultimate trip," said Julian Nott, who on Wedoesday announced his plan to make a non-stop, 25,000-mile trip through the jet stream while riding in a domed, pressurized goodola suspended from a pumpkio-shaped helium balloon. Nott will have the benefit of compact computers, strongerthan-steel fabrics and a satellite

link for transmitting television pictures. One detail remains unsettled - the second crew member. Nott said he was looking for a navigator with photographic skills and "an adventuring background." Riding in the fast-moving but relatively tranquil jet stream, the balloon should complete its trip in no more than 20 days and no lewer than 14, he said.

City regulations in Lakeside Ferguson are to marry July Park, Kentucky, prohibit detached structures next to a house, and that means no storage sheds, no dog houses - and no tree houses. So 13-year-old Jeffrey Kisor will have in the early 1960s letched to dismonth his tree house and his lion escudos (about \$74.05 parents, who fought City Hall over the law for seven months, are ready to give up their home. "I imagine man, Pedro da Costa, who we'll put our house on the market hoped to resell them at a p real soon," his father, Red Kisor, specialists in pop memoral said. "We'll find a place in north- directly to Yoko One, wh ern Kentucky that doesn't have all John Lenson. Maria Panle these restrictions." The law was aimed at tool and storage sheds, they had been given to he but city officials interpreted it as English aunt who once n also including dog houses, de- Beatles while working at a l
